ABOUT ME

B.E. Computer Science & Engineering (Cybersecurity) student with hands-on exposure to cybersecurity, cloud computing, Linux, Python, and networking. Interested in understanding how systems work, analyzing security problems, and building practical tools. Experience includes cybersecurity- and cloud-focused internship programs, plus self-directed security projects documented on GitHub and in a personal portfolio. Currently developing stronger foundations in AWS and cloud security.

TECHNICAL SKILLS

Cybersecurity Network traffic analysis, phishing analysis, cryptography fundamentals, password security, secure authentication
Cloud & Systems AWS fundamentals (IAM, EC2, S3, CloudWatch), Linux, Bash, Git/GitHub
Programming Python, C, Java, JavaScript, SQL, HTML/CSS
Tools / Libraries Wireshark, Scapy, Flask, aiohttp, SQLite, bcrypt, tldextract, VirusTotal API

EXPERIENCE

Cybersecurity Virtual Intern — AICTE EduSkills | Aug 2026 – Oct 2026
- Completed an 8-week Cybersecurity Virtual Internship under the AICTE–EduSkills program.
- The program certificate identifies the internship as supported by Palo Alto Networks.

Cloud Computing Intern — Codec Technologies Pvt. Ltd. (Virtual) | 01 Jul 2025 – 30 Jul 2025
- Completed a 1-month AICTE & ICAC-approved Cloud Computing internship program.

Cybersecurity Intern — Codec Technologies Pvt. Ltd. (Virtual) | 01 Jul 2025 – 30 Jul 2025
- Completed a 1-month AICTE & ICAC-approved cybersecurity internship program.

Cybersecurity Intern — CodeAlpha (Virtual) | 15 Feb 2025 – 15 Mar 2025
- Participated in a virtual cybersecurity internship program with practical exposure to cybersecurity activities.
- Worked on packet sniffing/network monitoring and phishing-analysis exercises, as documented in the earlier resume.

SELECTED PROJECTS

VirusTotal Telegram Bot | Python, aiohttp, Telegram Bot API, SQLite
Built an asynchronous security bot that submits URLs, files, hashes, and IP addresses to VirusTotal and summarizes multi-engine results; includes environment-based secret handling, scan history, watchlists, rate controls, caching, and defensive error handling.

PCAP Packet Analyzer | Python, Scapy
Developed a command-line analyzer for PCAP/PCAPNG files that reports IPv4 endpoints, TCP/UDP ports, protocols, and readable payload previews.

Phishing URL Risk Scorer | Python, tldextract
Created a rule-based URL risk scorer using indicators such as IP-based hosts, deep subdomains, risky keywords/TLDs, URL shorteners, @ symbols, and typosquatting patterns.

Cryptography Toolkit | Python, unittest
Implemented educational Caesar, XOR, and RSA cipher exercises from scratch with unit tests and documentation describing their limitations.

EDUCATION

B.E. — Computer Science & Engineering (Cybersecurity)
Mohamed Sathak A.J. College of Engineering, Chennai | 2023 – 2027 | CGPA: 7.5/10 | Last Sem GPA: 8.43 | No standing arrears

HSC — Computer Science
Rajah Muthiah Hr. Sec. School, Mandaveli | 2023 | 350/600 (58.3%)

SSLC
Nellai Nadar Matriculation Hr. Sec. School, Kottivakkam | 2021 | Passed (COVID assessment batch)

CERTIFICATIONS & PROGRAMS

- AICTE–EduSkills — Cybersecurity Virtual Internship (8 weeks, Aug–Oct 2026), supported by Palo Alto Networks
- Cisco Networking Academy — Introduction to Cybersecurity
- TATA Forage — Cybersecurity Analyst Job Simulation
- IBM — Introduction to Python
- IIT Bombay — Python 3.4.3
